

I. Amendments to the Claims

This listing of claims replaces without prejudice all prior versions and listings of claims in the application:

Listing of Claims:

1. (Currently Amended) A composition, comprising:

at least one metalworking fluid;

~~at least one antioxidant selected from the group consisting of butylated diphenylamine, alkylated diphenyl amines, N-alkylated phenylenediamines, alkylated monophenols, alkylated hydroquinones, hydroxylated thiodiphenyl ethers, alkylidenebis phenols, benzyl compounds, acylaminophenols, and esters and amides of hindered phenol substituted alkanolic acids; and~~

1,3,5-tris(2-hydroxyethyl)-S-triazine;

~~at least one biocide that is a triazine and wherein the butylated diphenylamine at least one antioxidant and the 1,3,5-tris(2-hydroxyethyl)-S-triazine at least one biocide are present in amounts sufficient to reduce oxidative degradation by achieving a bomb life of at least 75 minutes in accordance with ASTM D2272 and sufficient to reduce biological degradation by delaying bacteria onset by at least 18 weeks in accordance with ASTM 3946.~~

2-30. (Canceled)

31. (Currently Amended) The composition of claim 1, where the composition comprises 0.25 wt. % of the butylated diphenylamine, at least one antioxidant,

32. (Currently Amended) The composition of claim 1, where the composition comprises 0.25 wt. % of the 1,3,5-tris(2-hydroxyethyl)-S-triazine at least one biocide.

33-40. (Canceled)

41. (New) A composition, comprising:

at least one metalworking fluid;

nonylated diphenylamine; and

1,3,5-tris(2-hydroxyethyl)-S-triazine;

wherein the nonylated diphenylamine and the 1,3,5-tris(2-hydroxyethyl)-S-triazine are present in amounts sufficient to reduce oxidative degradation by having a total acid number of about 0.6 after 312 minutes of aging in accordance with ASTM D943 and sufficient to reduce biological degradation by delaying bacteria onset by at least 18 weeks in accordance with ASTM 3946.

42. (New) The composition of claim 41, where the composition comprises 0.25 wt. % of the nonylated diphenylamine.

43. (New) The composition of claim 41, where the composition comprises 0.25 wt. % of the 1,3,5-tris(2-hydroxyethyl)-S-triazine.
